PRESENTATION

Navalwood Technology is a company specialized in the field of shipbuilding that offers the manufacture of teak decks among its multiple services.

Our philosophy is based on Do It Yourself (D.I.Y.), developing custom assembly kits.

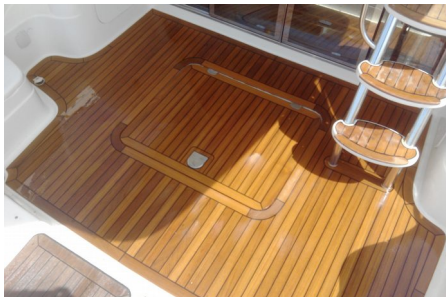

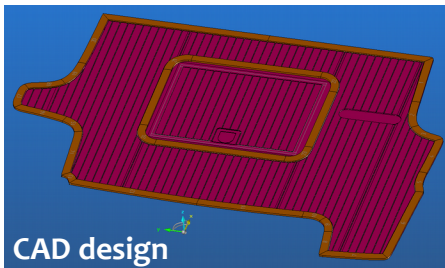

We carry out all the manufacturing, from the acquisition of the teak, deck design, wood machining, assembly of the slats and caulking of joints, making a kit easily installable on the deck of the boat..

MANUFACTURE

At Navalwood Technology we merge the use of the handcrafted techniques together with the latest technologies to offer the highest quality products at very competitive prices.

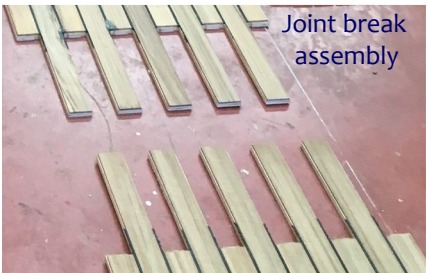

We have digital **measurement equipment** as well as 3D design software, which allows us to design the deck on the computer prior to manufacturing.

We have all kinds of machinery as well as a numerical control machining center (CNC), guaranteeing maximum precision and adjustment.

We use Burma teak wood FEQ quality, and caulking joints with the SIKAFLEX® system.

Products – Teak deck

TEAK 10

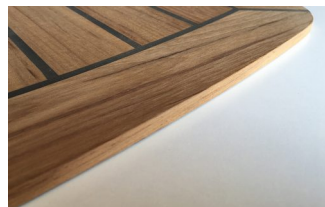

It is our *FIRST CLASS* product. It consist of:

- ✓ Solid teak clapboard 10 mm thick caulked
- ✓ A kit is supplied from the dimensions of the deck
- ✓ Easy assembly by your means
- ✓ In large decks, breaks joints are made for the assembly of the different panels

Its use is suitable for:

- ✓ Sailingboat decks
- ✓ Powerboats decks
- ✓ Platforms
- ✓ Pieces with special shapes

Products – Teak Deck

TEAK 3+5

Is a cheaper product than FIRST CLASS. It consist of:

- ✓ Teak clapboard , 3 mm thick sheet caulked on marine plywood 5 mm thick
- ✓ A kit is supplied from the dimensions of the deck
- ✓ Easy assembly by your means
- ✓ In large decks, breaks joints are made for the assembly of the different panels

Its use is suitable for:

- ✓ Powerboats decks
- ✓ Platforms

Products – Teak Deck

TEAK pieces

We think that you can manufacture your own deck using our products. We supply;

- ✓ Teak slat
- ✓ Solid teak clapboard 10 mm caulked
- ✓ Teak clapboard, 3 mm thick sheet caulked on marine plywood 5 mm thick.
- ✓ Possibility to serve the clapboards to jointbreakers
- ✓ Brushed teak boards, various widths and longs for gunwales, margins and spine central slat

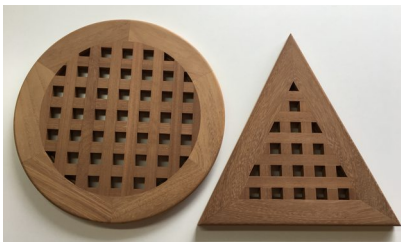

Products – Gratings

GRATINGS (kit)

It consist of:

- ✓ Solid teak grating 20 mm thick with external frame
- ✓ It is supplied from the dimensions provided
- ✓ Easy assembly by your means
- ✓ Straight gratings (length x width)
- ✓ Gratings of all kinds of shapes
- ✓ Possibility of supplying special thicknesses and spacings
- ✓ Possibility of manufacturing with other types of wood (African mahogany, Iroko, Ukola, etc.)

Products – Gratings

GRATINGS pieces

We think that you can manufacture your own grating using our products. We supply;

- ✓ 2 x 2 cm machined batten
- ✓ 2 x 1 cm machined batten
- ✓ 5 x 2 cm external frame batten
- ✓ Brushed teak boards, various widths and longs
- ✓ Possibility of manufacturing with other types of wood (African mahogany, Iroko, Ukola, etc.)

Products – At detail

AT DETAIL WOOD

In Navalwood Technology we offer the option of supplying all kinds of pieces, we only need a plan or sketch with the dimensions. We supply;

- ✓ Solid teak plank 52 mm and 76 mm thickness
- ✓ Little teak pieces at detail
- ✓ All types of profiles

Frequently Asked Questions (FAQs)

- ✓ **What is a custom teak deck kit?**
Since the deck of a ship does not respond to standard forms, the deck of each ship must be measured and manufactured. The teak clapboard kit is like a "coating" with the specific shape that is installed on the structural deck of the boat.
- ✓ **What do I need to request a quote?**
Send us some pictures to see the difficulties of the deck and an estimate of the square meters of the deck to replace.
- ✓ **How do I place an order?**
To start the works we need the form of the deck to be replaced. Send us a template of the deck shape made in wood, cardboard, plastic or any other material. We will reproduce that geometry so that when you install the clapboard kit there will be no variations. You can also send us a dimensioned drawing or a CAD file.
We also offer the customer the option to move and perform a digital measurement of the deck.
- ✓ **How do I perform the assembly?**
The assembly of the teak clapboard kit is done by gluing on the structural deck of the boat. Contact us and we will advise you with the guidelines to follow during the assembly process as well as the necessary products. We can also supply such products.
